PROJECTS

■ FEEDBACK CHANNEL

APRIL 2021

Web platform for Amdocs to track complaints and suggestions within the company, where I worked mainly in UI/UX Design and Frontend Development.

Project made with MongoDB, Express, ReactJS, NodeJS.

■ HITEC WEBSITE

JULY 2021

Official site of the event for the new students of Tec de Monterrey, where a questionnaire is answered and a student group is suggested according to the answers, made with a team, where I worked mainly in UI/UX Design and Frontend Development.

Project made with ReactJS and Firebase

■ DONATION IOS MOBILE APP

OCTOBER 2021

iOS Mobile Application to schedule and make donations with a rewards system. This was my first mobile application project.

Project made with Swift and Firebase

■ PORTFOLIO WEBSITE

JUNE 2022

I designed and developed my web portfolio to show who I am, what I do, the projects I've done and the tools I've used for them.

Project made with HTML and Less CSS

■ LERT

JUNE 2022

Labor Expenses Recovery Tool, developed for and with the help and follow up of IBM, with a squad of 6 members, where I worked on UI/UX Design, Frontend, and some Backend Development

Project made with ReactJS, Redux, Material UI, Flask, PostgreSQL
